

junit.Unit\_CompareChains  
Rank.test\_authentication  
\_probability

```
graph LR; A[junit.Unit_CompareChains  
Rank.test_authentication  
_probability] --> B[runtime.CompareChains.get  
_auth_complete]; A --> C[runtime.CompareChains.get  
_auth_probability];
```

The diagram illustrates a call from a JUnit test method to two runtime methods. On the left, a gray box contains the text 'junit.Unit\_CompareChains Rank.test\_authentication \_probability'. Two blue arrows originate from the right side of this box. The top arrow points to a white box containing 'runtime.CompareChains.get \_auth\_complete'. The bottom arrow points to another white box containing 'runtime.CompareChains.get \_auth\_probability'.

runtime.CompareChains.get  
\_auth\_complete

runtime.CompareChains.get  
\_auth\_probability
