

test.UnitRankCompare.test
_auth_probability

```
graph LR; A["test.UnitRankCompare.test  
_auth_probability"] --> B["runtime.ChainBuilder.get  
_authenticate_thread"]; A --> C["runtime.CompareChains.get  
_auth_probability"]
```

The diagram illustrates a call from a test method to two runtime methods. A gray box on the left contains the text 'test.UnitRankCompare.test' and '_auth_probability'. Two blue arrows originate from the right side of this box. The top arrow points to a white box containing 'runtime.ChainBuilder.get' and '_authenticate_thread'. The bottom arrow points to another white box containing 'runtime.CompareChains.get' and '_auth_probability'.

runtime.ChainBuilder.get
_authenticate_thread

runtime.CompareChains.get
_auth_probability
